1) The picture below shows that $7 \times 2 = 14$. 

Write a division sentence for the same picture.

$$\square \div \square = 2$$

2) The picture below shows that $10 \times 2 = 20$. 

Write a division sentence for the same picture.

$$\square \div \square$$

3) The picture below shows that $5 \times 5 = 25$. 

Write a division sentence for the same picture.

$$\square \div \square = 5$$
4) The picture below shows that \(10 \times 9 = 90\).

Write a division sentence for the same picture.

\[
\frac{\square}{\square} = 10
\]

5) The picture below shows that \(4 \times 3 = 12\).

Write a division sentence for the same picture.

\[
\frac{\square}{\square} = 4
\]

6) The picture below shows that \(8 \times 4 = 32\).

Write a division sentence for the same picture.

\[
\frac{\square}{\square} = 8
\]
7) The picture below shows that $6 \times 6 = 36$.

Write a division sentence for the same picture.

8) The picture below shows that $8 \times 8 = 64$.

Write a division sentence for the same picture.
9) The picture below shows that $8 \times 10 = 80$.

Write a division sentence for the same picture.

$$\boxed{\phantom{0}} \div \boxed{\phantom{0}} = 10$$

10) The picture below shows that $9 \times 8 = 72$.

Write a division sentence for the same picture.

$$\boxed{\phantom{0}} \div \boxed{\phantom{0}} = 9$$
Solutions for the assessment Division using pictures

1) $14 \div 7 = 2$

2) $20 \div 2 = 10$

3) $25 \div 5 = 5$

4) $90 \div 10 = 9$

5) $12 \div 3 = 4$

6) $32 \div 4 = 8$

7) $36 \div 6 = 6$

8) $64 \div 8 = 8$

9) $80 \div 8 = 10$

10) $72 \div 8 = 9$
